

## REMARKS

Claims 1 and 2 are pending in this application. Claim 1 has been amended to provide more specific detail regarding the structure, rather than the method of manufacture, of the lead portion of the grid. For this reason, the rejections under 35 USC 102(b) and 103 are now moot.

The specification has been amended to overcome the examiner's objection regarding the strike-through of the term "elastic". As well, claim 2 has been amended to overcome the rejection under 35 USC 112. Finally, the abstract and title have been revised to more accurately coincide with the scope of the present application.

Enclosed herewith is an amended drawing sheet, to change the designation provided by reference number 14. Reference numeral 14 correctly refers to the side terminal post. The drawings will be changed to show that the container is referred to, as shown in the specification, by reference numeral 12.

Finally, pursuant to MPEP 602.03, the Examiner is respectfully requested to waive the informality in the declaration or, at least, to hold the objection in abeyance until the application is found to have allowable subject matter.

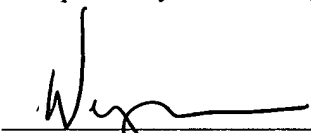

In the event that the transmittal letter is separated from this document and the Patent and Trademark Office determines that an extension and/or other relief is required, applicants petition for any required relief including extensions of time and authorizes the Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to

**Deposit Account No. 03-1952** referencing docket no. **337842009610**.

Respectfully submitted,

Dated: February 13, 2004
